

PASA Expenses

Running costs of the PASA campus marketplace: school demo and real launch · October 2026

Prices were checked in October 2026 and converted at **₱62.50 per US\$1** (₱62.54–₱62.58 in early October 2026). Services bill in US dollars, so peso amounts move with the exchange rate.

DEMO (NOW)

₱0 / month

Everything on free plans

REAL LAUNCH

≈ ₱3,430 / month

≈ ₱4,620 with paid app builds

BREAK-EVEN

≈ 158 / month

paid transactions (about 5 a day)

	Demo (now)	Real launch
Monthly	₱0	≈ ₱3,430 (₱4,620 with paid app builds)
One-time	₱0	₱1,563 Google Play account (required) + business registration
Per transaction	None (payments are simulated)	1.79%–2.23% (+ 12% VAT on the fee) of each GCash or Maya payment; 15% to Google or Apple on PASA Plus and boosts bought in the store apps

1. What PASA runs on

Service	What it does for PASA
Supabase	Database, log in, photo and document storage, live chat
Vercel	Hosts the website, the web app (iPhone users) and the admin panel
Expo EAS	Builds the Android and iPhone apps in the cloud (no Mac needed)
Google Play Store	Where Android users download PASA
Apple App Store	Where iPhone users download PASA
GitHub	Stores the code (free)
PayMongo (at launch)	Takes real GCash and Maya payments. Not used yet: the demo simulates payments
Remotion	Made the promo video. Free for individuals and teams of up to 3 people; check the license if the team grows

2. Demo / school prototype (current setup): ₱0 per month

Service	Plan	Cost	Limits to know about
Supabase	Free	₱0	500 MB database, 1 GB file storage, 50,000 monthly users. Pauses after about a week with no activity: open the app before a demo
Vercel	Hobby	₱0	Personal / non-commercial use only; 100 GB data transfer a month
Expo EAS	Free	₱0	15 Android and 15 iPhone builds a month, slower queue
GitHub	Free	₱0	
Domain	None (pasaph.vercel.app)	₱0	
Android install	APK link	₱0	No Play Store listing needed
iPhone install	Web app (Add to Home Screen)	₱0	No App Store listing needed

This is enough for the feasibility study, demos and a test group of students.

3. Real launch: about ₱3,430 per month

Once PASA takes real payments and earns money, the free plans no longer fit: Vercel's free plan doesn't allow commercial use, and Supabase's free plan pauses and has no backups.

Cost types: **Fixed** the same every month, however many students use PASA. **Step-fixed** fixed until usage outgrows the plan, then it jumps to the next level. **Variable** goes up and down with the number of payments.

Monthly costs

Service	Plan	Type	US\$ / month	₱ / month	Why
Supabase	Pro	Step-fixed	\$25.00	₱1,563	No pausing, daily backups (kept 7 days), 8 GB database, 100 GB storage, 100,000 monthly users; includes \$10 server credit
Vercel	Pro (1 seat)	Fixed	\$20.00	₱1,250	Required for commercial use; includes \$20 usage credit and 1 TB data transfer
Domain	Yearly, per month	Fixed	≈ \$1.50	≈ ₱100	About ₱700–₱2,000 a year depending on the name (.com is cheaper than .ph)
Apple Developer Program	\$99 a year, per month	Fixed	\$8.25	₱516	Required: PASA will be on the App Store. Billed \$99 (₱6,188) once a year
Total			≈ \$55	≈ ₱3,430	

Optional

Service	Type	US\$ / month	₱ / month	When you'd need it
Expo EAS Starter	Fixed	\$19	₱1,188	More than 15 builds a month or faster builds (brings the total to ≈ ₱4,620)
Business email (e.g. Google Workspace)	Fixed	≈ \$7 / person	≈ ₱440 / person	A team address like hello@pasa.ph
Bigger Supabase server	Step-fixed	+\$5	+₱313	Only if the app slows down with many users

Log-in and password-reset emails stay free at this size (for example Resend's free plan, 3,000 emails a month).

One-time costs

Item	Cost	Notes
Google Play developer account	\$25 (₱1,563)	Required: PASA will be published on the Play Store. Paid once, no yearly renewal
Business registration	Varies	DTI business name, barangay clearance, mayor's permit and BIR registration. Check current fees
PayMongo account	₱0	No setup or monthly fee

Google Play Store and Apple App Store

Item	Type	Cost	Notes
Google Play developer account	One-time	\$25 (₱1,563)	Required to publish on Google Play. Listed under one-time costs above
Apple Developer Program	Fixed	\$99 a year (₱6,188)	Required to publish on the App Store. Included in the monthly costs above as ₱516 a month
Tutoring payments	Variable	No store fee	Both stores let live one-on-one lessons between two people use outside payment (Google: not recorded; Apple: real-time person-to-person services), so they go through PayMongo
Item sales and rentals	Variable	No store fee	Physical goods (books, calculators, uniforms...) are paid outside the stores' billing on both
PASA Plus and boosts bought in the store apps	Variable	15%	Digital purchases inside a store app must use that store's billing. Google and Apple each keep 15% (their rate for developers earning under US\$1 million a year; on Apple, after joining the free Small Business Program). Purchases made on the website have no store fee
Testing before launch	—	₱0	Google: a new personal developer account must test with at least 12 testers for 14 days in a row before publishing.

Apple: testing with TestFlight is free, and every release is reviewed by Apple

Payment fees (per transaction, only at launch) Variable

Payment method	PayMongo fee	With 12% VAT	On a ₱165 booking
GCash	2.23%	≈ 2.50%	₱4.12
Maya	1.79%	≈ 2.00%	₱3.31
QR Ph	1.34%	≈ 1.50%	₱2.48

These come out of PASA's service fee, so the tutor or seller still gets their full price.

4. Can PASA pay for itself?

PASA earns its **service fee** (currently 10%, set by the admin) on every booking and sale, plus **PASA Plus** subscriptions.

Example month	Amount
200 paid bookings and sales, average price ₱300 (paid to tutors and sellers)	₱60,000
PASA's 10% service fee	+ ₱6,000
GCash fees (2.23% + VAT, on the ₱66,000 total paid)	– ₱1,648
20 students on PASA Plus at ₱49	+ ₱980
Store fee of 15% on PASA Plus (if all 20 subscribe in the Android or iPhone app)	– ₱147
Fixed monthly costs (section 3)	– ₱3,430
Left over	≈ ₱1,755

Break-even: each ₱300 transaction leaves PASA ₱30 – ₱8.24 (GCash fee with VAT, on the ₱330 paid) ≈ **₱21.76**.
Covering ₱3,430 a month takes about **158 transactions a month** (about 5 a day), fewer with PASA Plus subscribers.

5. Not included

- **Team time:** the app was built by the group, so there's no development cost here.
- **Marketing:** posters, Facebook ads, booths.
- **Devices** for testing.
- **Taxes** on PASA's income.
